IS DIRECTAIR® RIGHT FOR YOU?

Q: Is 100% reliable compressed air critical to your plant's operation?

100% RELIABLE COMPRESSED AIR

Since 1995 **DirectAIR®** has been setting the reliability standard for providing high quality compressed air. We have millions of hours of operation at our **DirectAIR®** sites without a single hour of lost production due to low air pressure! This is proven system dependability 24/7/365.

Q: Is your current compressor system extremely inefficient?

SIGNIFICANT ENERGY SAVINGS

We equip our **DirectAIR®** facilities with the most energy efficient equipment, systems and controls available today to provide significant energy savings.

Our **DirectAIR®** sites have typically resulted in 25-50% energy cost reductions.

Q: Are you facing a large compressed air related capital investment?

ELIMINATE CAPITAL COSTS

DirectAIR® does not require any up-front capital investment from your organization. **DirectAIR®** is a monthly fee for service that absorbs all of the up-front equipment and installation costs. **DirectAIR®** is your fourth utility, similar to your electric, gas and water providers.

Q: Are you experiencing excessive compressed air related maintenance, repair and rental costs?

NO COMPRESSED AIR RELATED MAINTENANCE COSTS

DirectAIR® will eliminate all of your compressed air equipment maintenance, repair and rental costs. Additional in-plant production equipment repair costs caused by poor air quality will also be eliminated.

Q: Is poor air quality causing production downtime and/or high scrap costs?

ELIMINATE COMPRESSED AIR RELATED PLANT DOWN TIME AND SCRAP COSTS

Compressed air has a significant impact on your plant's productivity and product quality. You will no longer experience production issues due to poor air quality or loss of compressed air with **DirectAIR®**.

If you answered yes to 3 or more of these questions, DirectAIR® is the right solution for your organization.
